

Your Clamp, Buckle, Banding and Tool Professionals for over 75 Years!

Banding & Buckles

Strapbinder stainless steel banding and buckles, for round or irregular surfaces, are ideal for a variety of applications that require corrosion protection against the elements. We offer three grades of stainless steel, Type 201, 304, and 316, to meet your specific application requirements. These chromium/nickel alloyed steels offer excellent resistance to chemical and electromechanical destruction caused by environmental conditions.

INDUSTRIES		APPLICATIONS	
• Utilities	• Military	• Wire & Cable Bundling	• Control, Antenna Attachment
• Municipalities	• Chemical Processing & Refining	• Identification	• Piping Insulation
• Telecommunication	• Construction	• Sign Securement	• Pole & Tower Attachment
• Oil & Gas	• Shipbuilding	• Traffic Management	
• Mining	• Pipelines	• T&D Component Securement	

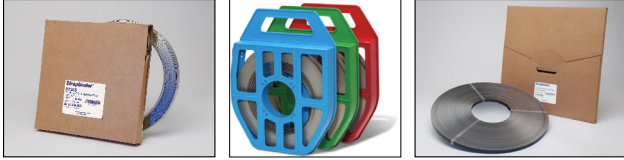

BANDING, BUCKLES, AND TOOLS

Stainless Steel Banding

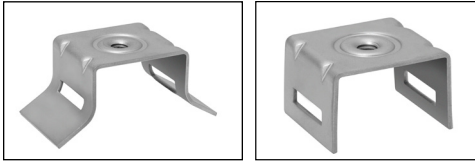

Strapbinder stainless steel banding is ideal for large diameter hose assemblies, sign securement, insulation applications and general construction use. It is made with a continued edger for safer handling.

Available in a variety of convenient dispensing coils

Sign Brackets

Stainless steel sign brackets are available for sign mounting, using Strapbinder stainless steel coils. The brackets are threaded and available with or without bolts and washers.

Application Tools

To complete your banding and buckle applications, we offer a full line of lightweight manual application tools designed specifically for round surfaces.

Spin Tight Tool

ST-001 & ST-402B

The spin tight tensioner features a spring-loaded gripper for more efficient band handling. A black chromium finish provides corrosion resistance. The ST001 and the ST402B are used for tensioning stainless steel bands and buckles.

Steelbinder™ Tensioner

ST101

This heavy duty ratchet tensioner is used with stainless steel strapping. It features a cutter and hammer knob for wing seal closing.

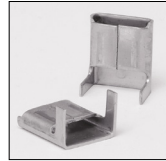

Buckles

Strapbinder buckles are used in conjunction with stainless steel banding and conform easily to round surfaces. Available in both ear and wing seal styles. Strapbinder buckles are made with Type 201 or Type 316 stainless steel and galvanized carbon steel to suit a wide variety of applications.

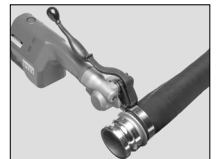

Wing Seals

Grade 304 Stainless Steel Wing Seals can be used with Strapbinder economy stainless steel strapping and Steelbinder Strapping.

Battery Powered Tensioning Tools

Strapbinder's battery powered tool tensions, locks and cuts the strap, eliminating the need for multiple tools, saving you time and money. Its versatile design can be used for J-Series, center punch and band and buckle applications.
